Web-side Stock-out Operation (document)
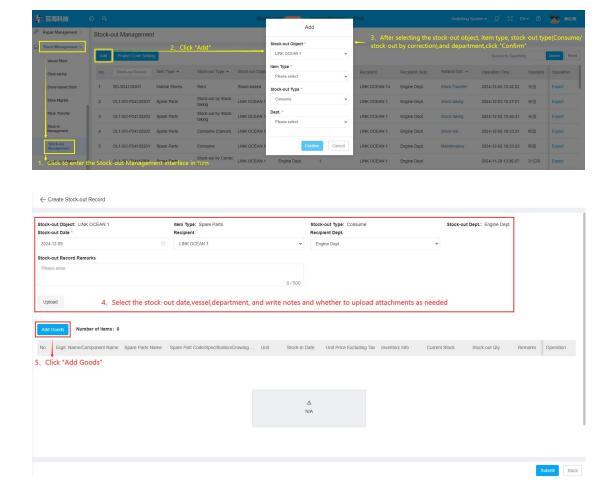

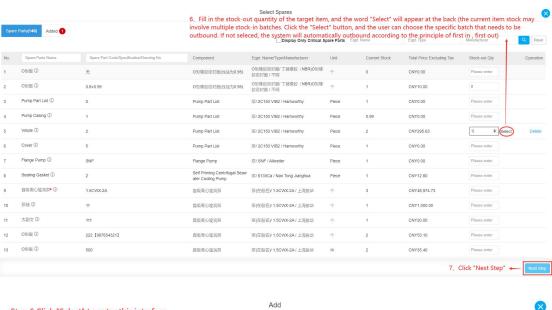

Users can log in to the OLISS Web side and follow steps 1-8 in the "Stock Management →Stock-out Management" interface.
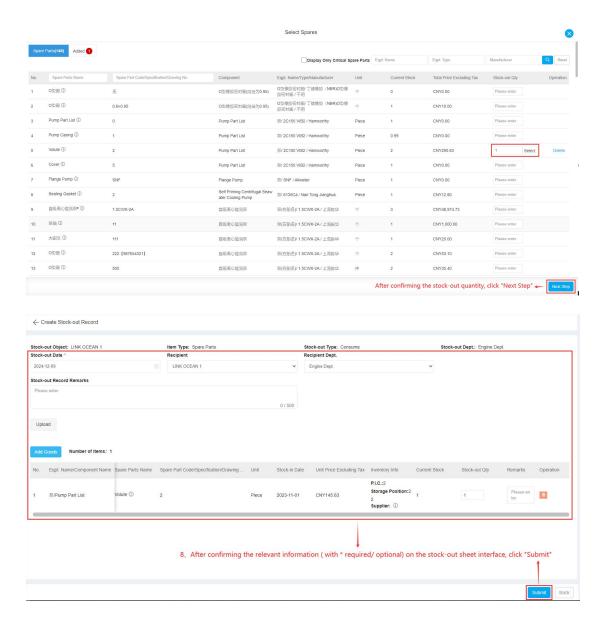

This document demonstrates the operation of consuming outbound-spare parts as an example.

6、Fill in the stock-out quantity of the target item, and the word "Select" will appear at the back (the current item stock may involve multiple stock-in batches. Click the "Select" button, and the user can choose the specific batch that needs to be outbound. If not seleced, the system will automatically outbound according to the principle of first in , first out)
