How to view shore-based spare parts stock (document)

Users log in to the OLISS Web side, click to enter the "Stock Management \rightarrow Shore-based Stock \rightarrow Spare Parts Stock" interface, which displays the spare parts inventory interface by default. All equipment with stock will be displayed. Clicking on equipment will display all parts with spare parts. At the same time, the list details of the component and its spare parts will pop up on the right side. Users can search by spare parts name, code/specification/drawing number, Position No., or view the current stock for stock-in / stock-out /editing operations.
