

How to Set Up Shore-Based Authority for Safety and Hazards (Document)

Users log in to the OLISS Web side, click "Setting → Role Authority" in sequence, click "Add" on the Role Authority interface, a pop-up window for adding new role authority appears on the right side. On this interface, fill in the relevant role name and sorting number, expand the menu permissions, check "SMS Management → Inspections → Shore-based authority" in sequence, and finally click "Confirm" in the bottom right corner to add shore-based authority.

The screenshot displays the OLISS Web interface. On the left, the 'Setting' menu is highlighted, and an arrow points to 'Role Authority'. The main area shows the 'Role Authority' table with columns for No., Role Name, and Sequence No. An arrow points to the 'Add' button. A pop-up window titled 'Add Role Authority' is shown on the right, containing input fields for 'Role Name' and 'Sequence No.', and a tree view of menu permissions. The 'SMS Management' menu is expanded, and 'Inspections' is checked. The 'Shore-based authority' checkbox is also checked. The 'Confirm' button is highlighted in the bottom right corner.
