

How to execute the yard repair item on the web side (Document)

After the yard repair scheme is finished, the record will be transferred to the personnel workbench with the authority to execute the voyage repair item.

User login in to the OLISS web side, enter the workbench interface by default, click **"Yard Repair-Execute"** in the workflow task, enter the yard repair-execute interface, can find the target item through the filter bar or keywords, click any position of the target item to enter the yard repair details interface, fill in the repair place, completion status, select the repair start date and end date, according to the need to upload attachment and add actual consumption goods, and finally click "Execute".

The screenshot shows the OLISS Workbench interface. At the top, there is a navigation bar with "Workbench (23830)", "Vessel Monitor", and "Find". A red box highlights "Workbench (23830)". Below the navigation bar, there is a "To-do List" section with a red arrow pointing to the "Yard Repair—Execute(4)" task. A red text box above the task says "1. User login in to the OLISS web side, enter the workbench interface by default, click 'Yard Repair-Execute' in the workflow task". Below the workflow tasks, there are three donut charts for "Labor Reimbursement", "Purchase Cost", and "Stock-out Cost".

The screenshot shows the "Yard Repair—Execute" interface. At the top, there is a navigation bar with "Workbench (23830)", "Vessel Monitor", and "Find". A red box highlights "Workbench (23830)". Below the navigation bar, there is a search bar with a red arrow pointing to it. A red text box above the search bar says "2. User can find the target item through the filter bar or keywords". Below the search bar, there is a table of repair items. A red box highlights the third row of the table, and a red arrow points to it. A red text box to the right of the table says "3. Click any position of the target item to enter the yard repair details interface".
