

How to release recruitment information

Users can log in to the website of OLSaaS, and operate in "Recruitment Management → Crew Recruitment" interface according to the following steps 1-3:

The screenshot shows the 'Add Crew Recruitment' interface. The left sidebar has 'Crew Recruitment' selected. The main area displays a table with one row: '1 Engineer 长胜号 Bulk carrier 内河'. The right panel is a form with various fields. Annotations include: '1. Click in turn to enter "Crew Recruitment" interface.' pointing to the sidebar; '2. Click "Add"' pointing to the 'Add' button; and '3. Fill in the recruitment information as needed (items marked with * are required), and finally click "Release".' pointing to the 'Release' button.

Explanation of the information filled in:

1. Visible Range

① Huhaipin: If "Huhaipin" is selected, the recruitment information will be released to "Huhaipin" crew applet. The crew registered in "Huhaipin" will be able to see the recruitment information released by users and submit resumes for the ranks (crews need to register, authenticate personal information and improve their resumes on "Huhaipin" applet.);

② Enterprise Recruitment: If "Enterprise Recruitment" is selected, the recruitment information can be released to other enterprises in OLSaaS, or designate cooperative units to publish recruitment exclusively, which is convenient for internal recruitment and recommendation among enterprises.

2. Vessel Name

If "Hide Vessel Name" is selected, the name of the vessel cannot be seen in the recruitment information published by the user;

If "Hide Vessel Name" is not selected, users can select the ships that need to recruit crew or they can manually fill in the name of any ship.
