

How to view shore-based marine stores stock (document)

Users log in to the OLISS Web side, click to enter the "Stock Management → Shore-based Stock " interface, which by default displays spare parts inventory. Manually switch to the material inventory interface, click "Stock Query" to enter the query page, and click "Export" to export and view the entire shore-based inventory table. Users can search for target items by keyword or through the search bar, or retrieve target items based on material code or product name; in the "Stock Qty" column, users can view the Stock Qty of target stores stock and perform operations such as stock-in/stock-out on target items.
