

How to generate a repair scheme from repair plan (Voyage Repair) (Document)

The repair plan will be automatically generated after the repair application is approved.

After logging in to the OLISS web side, users can enter the workbench interface by default, and click the "Repair Plan" under the waiting task to enter the repair plan interface. In this interface, you can find target repair items by filtering conditions or searching for keywords. Check the target service item, and then click the wrench icon to enter the select service type interface. After selecting the repair type ("Voyage Repair") and belonging company, click "Next".

On the arrange voyage repair interface, select the priority level and plan voyage repair date. Fill in the repair scheme name, plan instruction, and upload attachments as needed. Add repair items as required, click "Add Service Provider," and on the select service providers interface, choose your target service provider. Click "Next Step". For the selected service provider, you can fill in the quotation information or directly send enquiry. After filling in the quotation or supplier's quote, click "Select this scheme," and finally click "Submit" to enter the repair scheme approval process.

1. After logging in to the OLISS web side, users can enter the workbench interface by default, and click the "Repair Plan" under the waiting task

2. You can find target repair items by filtering conditions or searching for keywords

You have 7 repair plans that have not been submitted.
