

How to view and export vessel incident records on the web side (documents)

Users can log in to the OLISS Web side , click to enter the "Vessel Incident Records" interface in turn. You can be retrieved by "Vessel", "Incident Type", " Treatment State" or "Time Range", click "Export" to export the list of vessel records, click "Export" on the right side of the specific incident record to export the excel or pdf file of the record.

The screenshot displays the OLISS Web interface. The top navigation bar includes the company logo, a search bar, and various system controls. The left sidebar contains a menu with items like Budget Management, Voyage Number Management, Vessel Report, Patrol Inspection, SMS Management, Customs Affairs Management, Vessel Incident Records (highlighted), Address Book, E-Signature, and Setting. The main content area is titled 'Vessel Incident Records' and features a table of incident data. Annotations with red arrows and boxes provide step-by-step instructions: 1. Click 'Vessel Incident Records' in the sidebar. 2. The table can be filtered by 'Vessel', 'Incident Type', 'Treatment State', or 'Time Range'. 3. Click the 'Export' button at the top of the table. 4. Click the 'Export' button on the right side of a specific incident record to download the file. The table lists 7 incidents with columns for No., Occurrence Time, Vessel, Voyage No., Incident Type, Incident Details, Treatment State, Status, and Operation.

No.	Occurrence Time	Vessel	Voyage No.	Incident Type	Incident Details	Treatment State	Status	Operation
