When will the web-side crew assessment task be generated (document)

There are currently four types of assessment, namely **dimission evaluation, probation evaluation, regular evaluation** and **temporary evaluation** .

The generation time of the above four evaluation types is as follows:

1. **Time for generating dimission evaluation** : the day when the crew disembarks and leaves the vessel, that is, when the crew management-crew arrangement interface has the action of operating the crew to disembark, the dimission evaluation of the crew will be generated;

2. **Time for generating probation evaluation**: After the crew boards the vessel, it is generated according to the number of days filled in. If the probation evaluation generation time of the crew assessment process configuration interface is 10, the probation evaluation task of the crew will be generated within 10 days;

3. **Time for generating regular evaluation** : It is generated in the early morning of the 1st of each month. If the regular assessment generation time of the crew assessment process configuration interface is checked "February" and "May", the regular evaluation tasks of the crew will be generated in the early morning of the 1st of February and May.

4. **Time for generating temporary evaluation**: generated when added.
