

How to execute stock-in/stock-out operations quickly in "Vessel Stock" interface

Users can log in to the website of OLSaaS, and operate in "Stock Management → Vessel Stock → Spare Parts" interface according to the following steps 1-5:

The screenshot shows the OLSaaS Vessel Stock interface. A sidebar on the left contains a menu with 'Vessel Stock' highlighted. A red box around the sidebar is labeled '1. Click in turn to enter the interface of "Vessel Stock"(The spare parts inventory interface is displayed by default)'. The main content area shows a search filter 'Victory' and 'All' with a red arrow pointing to it labeled '2. Filter by conditions'. Below this is a table titled 'SPARES INVENTORY LIST' with columns for Spares Name, Spars Type, Locati, Component Name, Dept., Unit, Another Name/..., Current..., 不含税总价, Storage Location, and Operation. A red arrow points to the 'Operation' column, labeled '3. After finding the target item, click "Stock-in" or "Stock-out" to enter the corresponding interface for operation'. The table contains one row for '大号O型圈' (Large O-ring) with component name '3/2-Way Solenoid Valve' and unit '个'.
