

操作互海通时有些弹窗无法展示，如何处理

有些浏览器，如QQ浏览器默认不允许其他网站显示弹窗，导致用户在QQ浏览器上登录互海通操作时，有些弹窗无法展示，也就无法完成操作。

针对以上问题，用户可以在浏览器更改设置即可。以QQ浏览为例，操作如下：

The image shows a sequence of steps to adjust browser settings in QQ Browser to allow pop-ups. The first screenshot shows the browser's main interface with a red box around the menu icon in the top right corner, labeled "1、点击浏览器右上角的“三”图标". The second screenshot shows the "Settings" page with a red box around the "Settings" gear icon, labeled "2、点击“设置”". The third screenshot shows the "Advanced" settings page with a red box around the "Content Settings" link, labeled "3、点击“安全与隐私” - “内容设置”". The fourth screenshot shows the "Content Settings" dialog box with a red box around the "Pop-up Windows" section, labeled "4、在“弹出式窗口”下，选择“允许所有网站显示弹出式窗口”". The fifth screenshot shows the "Pop-up Windows" section with a red box around the "Allow all websites to show pop-up windows" option, labeled "5、点击“完成”".

1、点击浏览器右上角的“三”图标

2、点击“设置”

3、点击“安全与隐私” - “内容设置”

4、在“弹出式窗口”下，选择“允许所有网站显示弹出式窗口”

5、点击“完成”
