How to deal with "Repair Settlement"

At present, the types of repair settlement supported by OLSaaS are Voyage Repair and Yard Repair.

Users can log in to the website of OLSaaS, and operate in Repair Management → Repair Settlement interface according to the following steps 1-4:

(Here we take "Voyage Repair" as an example)

Description:

After the document is submitted, the user can view the approval status of the document by filtering criteria in "Repair Management → Repair Settlement"interface.

Next Step:

After the settlement document is submitted for approval, it will be transferred to the workbench of the personnel with approval authority according to the workflow.
