

How to view shore-based oil stock on the web (document)

Users log in to the OLISS Web side, click to enter the "Stock Management → Shore-based Stock → Oil Stock" interface in sequence, manually switch to the oil stock interface, display the current stock of oil in the "Current Stock" column of the list, click on the "Stock-in" on the right side of the row where the oil is located to perform the inbound operation, click on "Stock-out" to perform the outbound operation, and click on "More" to edit and view the inbound and outbound details.

The screenshot displays the OLISS Web interface for Oil Stock management. The navigation menu on the left includes "Stock Management", "Vessel Stock", "Stock-taking", "Shore-based Stock", "Store Migrate", "Stock Transfer", "Stock-in Management", "Stock-out Management", "Stock-in/out Details", "Purchasing", and "Management". The "Shore-based Stock" option is highlighted with a red box and an arrow pointing to the instruction: "1. Click to enter the shore-based stock interface in turn".

The top header shows "Workbench 30760", "Vessel Monitor", and "Find". The "Oil Stock" tab is selected and circled in red, with an arrow pointing to the instruction: "2. Manually switch to the oil stock interface".

The main content area features a table with the following columns: No., Oil Name, Specification, Unit, Min/Max Stock, Current Stock, Total Price Excluding Tax, and Operation. The "Current Stock" column is highlighted with a red box and an arrow pointing to the instruction: "3. Display the current stock of oil in the 'Current Stock' column of the list".

The table contains five rows of data:

No.	Oil Name	Specification	Unit	Min/Max Stock	Current Stock	Total Price Excluding Tax	Operation
