

## How to generate the data of the equipment running hour list

First, confirm whether the equipment list of the vessel has been imported in Equipment List interface.

Users can log in to the website of OLSaaS, and operate in "Vessel Management → Equipment List and Maintenance → Maintenance Management → Maintenance Plan of Year" interface according to the following steps 1-5:

**1. Click in turn to enter the Equipment List interface**

**2. Select a vessel, and the equipment list is displayed on the right**

No.	Equipment Name	Subsystem	Equipment No.	Equipment Type	Equipment Level	Manufacture
1	甲板空压机	Starting Air System	AS-0102-000-001			
2	应急空压机	Starting Air System	AS-0102-000-002			
3	主空压机	Starting Air System	AS-0102-152-001			

**3. Click in turn to enter the Maintenance Plan of Year interface**

**4. Select "Running Hours" for the maintenance period here, and the specific maintenance information will be shown below**
