

How to set up incident type on the web side (document)

Users can log in to the OLISS Web side and follow steps 1-6 in the "Vessel Incident Records → Incident Type Setting" interface.

2. Switch to "Incident Type Setting"

3. Click "Add"

4. Fill in incident type and remarks (with * required)

5. The approval process is closed by default (button gray), and it will turn blue after clicking Enable. (Users can set approval processes according to actual needs select/add approval roles, CC roles)

6. Click "Confirm"

| No. | Role Name | Operation |
|-----|---------------|-----------|
| 1 | Please select | No |

| No. | CC Role | Operation |
|-----|---------|-----------|
|-----|---------|-----------|

After adding, you can edit and off it

| No. | Incident Type | Approval Process | Remarks | Treatment State | Operation |
|-----|---------------|-----------------------|---------|-----------------|-----------|
| 1 | PSC检查出现重大失误 | Required for Approval | | Valid | Edit Off |
