

How to generate a repair scheme from repair plan (Yard Repair) (Document)

The repair plan will be automatically generated after the repair application is approved.

After logging in to the OLISS web side, users can enter the workbench interface by default, and click the "Repair Plan" under the waiting task to enter the repair plan interface. In this interface, you can find target repair items by filtering conditions or searching for keywords. Check the target service item, and then click the wrench icon to enter the select service type interface. After selecting the repair type ("Yard Repair") and belonging company, click "Next".

On the arrange yard repair interface, select the priority level and plan yard repair date. Fill in the repair scheme name, plan instruction, and upload attachments as needed. Add repair items as required, click "Add Service Provider," and on the select service providers interface, choose your target service provider. Click "Next Step". For the selected service provider, you can fill in the quotation information or directly send enquiry. After filling in the quotation or supplier's quote, click "Select this scheme," and finally click "Submit" to enter the repair scheme approval process.

The first screenshot shows the 'Workbench' interface. A red box highlights the 'Workbench' tab in the top navigation bar. A red arrow points from this tab to the 'Repair Plan' link in the 'Waiting Task(32)' section. A red text box with an arrow pointing to the 'Repair Plan' link contains the text: "1. After logging in to the OLISS web side, users can enter the workbench interface by default, and click the 'Repair Plan' under the waiting task".

The second screenshot shows the 'Repair Plan' interface. A red text box with an arrow pointing to the 'Keywords Searching' input field contains the text: "2. You can find target repair items by filtering conditions or searching for keywords". Below this, a table lists repair plans. A red box highlights the first row, which includes a checkbox, the text '空气系统 ①', and various details. A red text box with an arrow pointing to the wrench icon in the bottom left corner contains the text: "3. Check the target service item, and then click the wrench icon".
