

# How to view shore-based spare parts stock (document)

Users log in to the OLISS Web side, click to enter the "Stock Management → Shore-based Stock → Spare Parts Stock" interface, where spare parts inventory is displayed by default. Click "Inventory Query" to enter the query page, and click "Export" to export and view the entire shore-based inventory table. Users can search for the target item by keyword or through the search bar, or retrieve the target item based on the spare part name, code/specification/drawing number, and location number; in the "Current Inventory" column, users can view the current inventory of the target spare part and also perform operations such as outbound/inbound on the target item.
