## How to Acceptance Check the Record of Vessel Shore Power Use (Document)

After logging in to the OLISS Web side, users will default to enter the workbench. Click "Shore Power Use" in the process approval tasks to enter the shore power use interface, where they can filter target items by vessel or power supply start time range. Click anywhere in the row of the target vessel to enter the shore power usage details interface, and click "Accepted" or "Reject" based on the actual situation.

If you click "Accepted", an intermediate pop-up window will appear. Fill in the acceptance approval comments, upload attachments if necessary, and finally click "Confirm" to complete the acceptance.

If you click "Reject", a confirmation pop-up window will appear. Select to return to an approved approval node, support returning to the submitter, fill in the reason for return, and finally click "Confirm", then the documentation will be returned to the submitter or the workbench of the previous node's approver.
