

How to invalidate the Voyage Oil Consumption Report (document)

Users can log in to the website of OLISS, and click in turn to enter "**Voyage Oil Consumption Report**" interface , click on "Invalid" to pop up the middle window, fill in the Invalidation Reason, and click "Confirm" to invalidate the fuel consumption report.

The screenshot shows the 'Voyage Oil Consumption Report' interface. On the left sidebar, 'Vessel Report' is expanded, and 'Voyage Oil Consumption Report' is selected. A yellow arrow points to this menu item with the annotation: '1. Click in turn to enter Voyage Oil Consumption Report interface'. In the main area, a table lists consumption reports. A yellow arrow points to the 'Invalid' button in the 'Operation' column of the first row, with the annotation: '2. Click "Invalid"'. A modal window titled 'Invalidation Reason of Oil Consumption Report' is open, showing a text input field for the reason and 'Confirm' and 'Cancel' buttons. A yellow arrow points to the 'Confirm' button with the annotation: '3. Fill in the Invalidation Reason, and click "Confirm"'. The table has columns: No., Vessel Name, Voyage I, Route, Voyage Time, This Consumption, Consumption Analysis, Current Balance, Status, Attachment, and Operation. The first row shows a report for 'LINK OCEAN 1' with status 'Unsubmitted'.

Description:

After the voyage oil consumption report is invalid, the stock-out list in Stock-out Management interface will be automatically deleted(the original deducted inventory will be automatically restored.)
