

When users mistakenly operate duplicate stock-in items, they can select "Stock-out by Correction" as the stock-out type on the "Stock Management → Stock-out Management" interface. When users mistakenly operate duplicate stock-out items, they can select "Stock-in by Correction" as the default stock-in type on the "Stock Management → Stock-in Management" interface.

This document introduces the example of repeat storage and stock-out by correction.

1. Click to enter the stock out management interface in turn

2. Click "Add"

3. Select the stock-out object, item type, stock-out type (Note: Select "Stock-out by Correction" for stock-out type), and department, then click "Confirm"

4. Select the stock-out date, vessel, department, fill in the remarks, or upload attachments

5. Click "Add Goods"

Select Spares
