

How to check the source of stock-in items

Inventory of goods(spare parts, stores and oil) includes "Vessel Stock" and "Shore-based Stock". Users can log in to the website of OLSaaS, and operate in "Stock Management → Vessel Stock" interface according to the following steps 1-3:

The system displays the spares inventory interface by default, which can be switched.

1. Click in turn to enter "Vessel Stock" interface

2. Search the inventory of goods through screening and keywords.

Source of "Correction" stock : Add "Document of Correction" In "Stock Management" → "Stock-in Management" interface

Source of "Purchase" stock: Purchase Order with the purchase modes of "Vessel Purchase and Ashore Inquiry"

(For the items which put in storage after inquiry and quotation of purchase orders, the supplier name will be displayed)

Note:

Here we take querying the source of goods in "Vessel Stock" interface as an example in this document and the operation steps of "Shore-based Stock" are the same.
