

## Vessel Service Type Configuration

Users can log in to the website of OLSaaS, and operate in "Vessel Service → Service Application" interface according to the following steps 1-3:

The screenshot displays the 'Service Application' interface. On the left, a navigation menu includes 'Vessel Service' and 'Service Application'. The main area shows a table of service types:

No.	Name	Application No.	Vessel	Dept.	Service Type	Planned Completion ...
1	船舶压载水检验项目	VSA-22112003	长胜号		检验-压载水检验	2022-11-22
2	长胜号船舶监造服务单	VSA-22090702	长胜号		技术-船舶监造	2022-09-10

Below the table is the 'Service Type Configuration' form. It includes a '+ Add Service Type' button and a 'Save' button. The form has three input fields: 'Please enter the type name.', 'Please enter the English name.', and 'Please enter the code.'.

3. After clicking "Add Service Type", you need to improve the type-related information in turn, and finally click "Save".

### Description:

After the service type configuration is completed, the user can only select the service type when initiating the service application form. Otherwise, it cannot be selected!
