

Intelligent warning during purchase application approval

After the Purchase Application is submitted, according to the approval process, the documents will be transferred to the approver's workbench for approval.

Users can log in to the website of OLSaaS, and operate in "**Workbench → Workflow Task → Purchase Application (To Be Approved)**" interface according to the following steps 1-4:

1. Log in to the website of OLSaaS, enter workbench interface by default, and click "Workflow Task → Approve → Purchase Application (To Be Approved)"

2. Click the target document to be approved to enter the interface below

3. If there are items purchased by the vessel within 3 months in the purchase application, an intelligent warning will appear.
