

3.Offline Operation on the App platform

The user switches to the "Management" page, clicks on "Maintenance Management" to open the list of maintenance items (Step 1), then clicks on "Offline Data" in the top right corner (Step 2). Within the popped-up offline maintenance data, the user clicks on "Download Data" in the top right corner (Step 3) to download maintenance tasks in advance while connected to the internet.

In the popped-up "Download Offline Data" interface, the user can select the vessel, department, and date to download all the data to their mobile phone. (If the selected time period is long, the download time will be slightly longer, please wait patiently). After clicking on it, select "Offline Data" in the top right corner, and the offline maintenance data will automatically be synchronized to the server.

PIC Status Dept.

The status of the maintenance item will change to "Done", and appear "unsynced"

M/E unsynced Done
